

## Mineral Conflict Statement

We the undersigned, **PARKER HANNIFIN MANUFACTURING FRANCE SAS**, Fluid System Connectors Europe, manufacturer of fittings and industrial valves, hereby certify that products listed below do not contain any Mineral Conflict.

To precise Parker position regarding mineral conflict compliance, a list of sensitive raw material is under control: brass is widely used in our product, and more specifically in the below product mentioned in this certificate, and tin is a chemical substance that can be found in Brass alloy. Tin is belonging to the mineral conflict sensitive list but this chemical substance is not a constituent used or bought by our material provider to manufacture their brass alloy. Tin is present in the brass chemical formulation as impurity or very small trace and by consequence, do not infringe mineral conflict expectations.

**PRODUCT IN COMPLIANCE WITH THE ABOVE SPECIFICATIONS:**

**LEGRIS part number:** all  
**Description:** fittings & tubings

**Date:** Thursday, 18 October 2018
